

Senior Software Engineer – Server Development

Venture-backed software company in the Boston area seeks a seasoned individual to join our software engineering team. The successful candidate will have built enterprise-class, commercial, Java-based software products and will have a track record designing and creating large-scale applications. The ideal individual will also have excellent oral and written communication skills, and a solid understanding of the full software development life-cycle. Prior experience working in an Extreme Programming environment is desirable.

Responsibilities will include acting as a senior-level resource on the team, designing, developing, and testing commercial healthcare software applications. The work will be done using the J2EE framework. Prior experience with SOAP is also strongly desired.

Required Experience:

- Minimum of 8-10 years of related experience in a commercial software development role
- Hands-on development experience using Java, J2EE, XML, SOAP and SQL
- Hands-on experience with Linux, including Linux installation and administration, and experience with shell or other Unix scripting languages
- Hands-on experience with Oracle and other commercial, enterprise-class relational databases, including experience with database installation, administration, and performance tuning.
- Hands-on experience with the WebLogic application server
- Prior experience as a hands-on leader of small development teams is desirable
- Extensive experience with Eclipse, ant, junit and junitperf
- Strong object oriented programming skills
- Prior experience with performance optimization and troubleshooting of Java applications
- Solid oral and written presentation skills
- Previous experience with complex business application development projects
- Demonstrated ability to work independently or within a team environment
- Strong problem solving skills
- Prior experience with healthcare applications is strongly desired
- Prior experience working in an Agile Programming environment is desirable

Personal Attributes:

- Highest personal ethics
- "Can do" attitude
- Minimalist/pragmatic solution seeker
- Highly organized and process-oriented
